SAINT-GOBAIN GLASS

SGG DECORGLASS®

Traditional patterned glass from Saint-Gobain Glass.

SGG DECORGLASS is an exclusive range of traditional patterned glasses, designed to enhance interiors and manufactured by Saint-Gobain Glass, Europe's leading glass manufacturer.

Ideal for both internal and external applications in residential and commercial buildings, each distinctive SGG DECORGLASS pattern provides a different degree of obscuration. This affords varying levels of privacy, whilst maintaining high levels of natural light transmittance.

Applications:

SGG DECORGLASS can enhance any interior scheme, creating soft, diffused light and effective screening where required:

Exterior applications:

- windows, doors, side panels, conservatories and porches
- single and double-glazed

Interior applications:

- internal doors, partitions, screens, shower screens
- furniture - table tops, kitchen furniture, counter tops.

Product variations:

In addition to being toughened for safety and laminated for safety and security, SGG DECORGLASS can be incorporated into double-glazed units, in order to combine privacy with:

Enhanced thermal insulation:

- Mindful of the proposed changes to Documents L and J, combine SGG DECORGLASS with SGG PLANITHERM® - the latest in ultra-neutral low-emissivity glasses, for superior thermal insulation. U-values as low as 1.3W/m²K can be achieved.

Acoustic insulation:

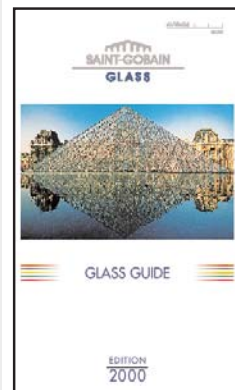

- Wherever privacy and noise are a concern, combine SGG DECORGLASS with SGG STADIP SILENCE®, for effective insulation against air, train and road traffic, as well as noisy neighbours.

Customisation:

- To compliment traditional settings or to add a touch of individuality to windows and doors, leaded and coloured designs can be applied to the glass in a wide range of variations.

Make us part of your vision.
